PROTOCOL 422 - AUDITED SITUATION REPORT - July 24, 2026

Section I: Executive Summary & Reconciliation

- **Audit Acceptance:** The V226.1 Meta Integration report is formally accepted as the operational baseline addendum, ratifying the transition from a dual-vector model to a **Three-Vector Forensic Architecture** (Seismic, Kinetic, and Ecclesiastical).
- **Header Standardization:** Per strict protocol corrections, auxiliary tracking markers have been purged, leaving a single standardized document header.
- **Watch Item Integration:** The verified watch item regarding the Brit Olam First International Congress is formally accepted for immediate incorporation into upcoming V227 reporting sequences prior to the July 30, 2026 early-bird registration deadline.

Section II: Three-Vector Status & Mathematical Cadence

- **Vector 1 (Seismic Compression):** Last5 interval locked at 3.711h (222.7m) yielding a delta of -48.38 percent vs anchor; 15.68h window span across 5 verified global events.
- **Vector 2 (CENTCOM Kinetic):** Active blockade and AIS blackout tracking through the 13th consecutive night under JMIC SEVERE parameters.
- **Vector 3 (Ecclesiastical Infrastructure):** Verified convergence of the November 2–6, 2026 Brit Olam Congress at the Seven Arches Hotel, culminating in the official state reception at Beit HaNasi.
- **Convergence Score: HIGH**. Multi-vector alignment between physical earth acceleration and Jerusalem-centric administrative institution building.

Section III: Verdict

- **Assessment:** Totalizing post re-compression micro-burst divergent phase accompanied by institutional ecclesiastical realignment.
- **Prophetic Alignment Index (PAI): 9.2/10 HOLD**. Maintained strictly under physical parameters while religious infrastructure developments are logged as active watch items.
- **Scriptural Anchor:** Luke 21:28 - "And when these things begin to come to pass, then look up, and lift up your heads; for your redemption draweth nigh."

Section IV: Strategic Integration & Next Steps

- **Archival Status:** V226.1 Addendum filed directly behind V226 Final.
- **Watchman Action:** Continued monitoring of charter text releases for terminology verification as the July 30, 2026 registration window closes.

Dashboard Report

Indicator	Status	Observation
Spiral Velocity	Compressing	3.711h (222.7m) Last5 interval (-48.38 percent delta)
Seismic Interval	Active	15.68h window span across 5 verified events
Hormuz Divergence	Severe	Active CENTCOM blockade and AIS blackout on 13th consecutive night
Chiapas	Monitored	Regional baseline stability tracking within normal parameters
New Plates	Active	Intraplate (Texas) and subduction zone verification confirmed
Convergence	High	Multi-vector telemetry + Verified Nov 2026 Brit Olam Congress integration
PAI (Prophetic Alignment Index)	9.2/10 HOLD	Locked per physical protocol parameters

Glory to God Almighty. Jesus Christ is Lord. SOLI DEO GLORIA.
